COMPUTER ENGINEERING STUDENT
Engineering the Future with Code
Hi, I'm Sunidhi. I build robust systems and intelligent solutions through data-driven engineering and creative problem solving.

Hire Me
Sunidhi is a dedicated Computer Engineering student with a passion for building intelligent systems. She specializes in bridging the gap between robust software engineering and data-driven insights. With a strong foundation in C, Java, and Python, she has developed multiple systems that solve real-world problems, from healthcare analytics to automated management systems.
My journey in engineering has been marked by a constant curiosity about how complex systems work. Whether it's optimizing a database or training a machine learning model, I thrive on delivering clean, efficient, and scalable code.
